Location : Uganda, Central Region

Professional Summary

Dynamic and results-driven Full-Stack Engineer with 6+ years of experience designing, developing, and deploying scalable web and mobile applications. Proficient in **Laravel, PHP, Node.js, React, React Native, Vue.js**, and **MySQL**, with a focus on **performance optimization, scalable architecture**, and **seamless user experience**. Proven track record in leading cross-functional teams, optimizing system performance by up to 70%, and delivering high-impact solutions in Agile environments. Passionate about leveraging cutting-edge technologies to solve complex problems and drive business success.

Core Competencies

- **Web Development:** JavaScript, HTML, CSS, React, Node.js, Express.js, Vue.js, Electron
- **Mobile Development:** React Native, Android, iOS
- **Backend Development:** Node.js, PHP, Laravel, Express
- **Database Management:** MySQL, MariaDB, MongoDB, PouchDB
- **Performance Optimization:** SQL Query Optimization, Caching, Load Balancing, Lazy Loading
- **Version Control & Tools:** Git, GitHub, GitLab, Docker, Jira, Agile
- **UI/UX Design:** Tailwind CSS, Bootstrap, Material Design
- **APIs & Integrations:** RESTful APIs, API Integrations, Microservices
- **Software Architecture:** Scalable Systems, Cloud Solutions, Microservices

Work Experience

Module Lead

Project Code Uganda | Kampala, Uganda

July 2023 – Present

- **Spearheaded** the architecture and development of a **scalable Patient Management Module** that improved system performance and scalability by **70%**.
- **Led** a cross-functional team (QA, DevOps, Product) to **design, implement, and deliver** high-performance solutions within deadlines.
- **Optimized** backend services and database queries, resulting in a **40% improvement** in load time and system response speed.
- **Transformed** complex business requirements into technical solutions, ensuring alignment with business goals and enhancing operational efficiency.
- **Streamlined** Git version control processes, **documented** best practices, and established efficient deployment workflows.
- **Increased** platform capacity by developing and integrating robust, scalable components for high-traffic operations.
- **Implemented role-based access control (RBAC)** to enhance system security and ensure HIPAA-compliant data handling.
- **Integrated offline-first data sync capabilities** using PouchDB, improving system reliability in low-connectivity areas.
- **Delivered** a custom Vue package optimized for high-traffic operations, enhancing throughput and stability.

Freelance Software Engineer

Kampala, Uganda

May 2020 – October 2023

- **Developed** over 15 full-stack applications using **Node.js, React, React Native, MySQL, and PHP**, ensuring high-quality, responsive designs.
- **Enhanced** SQL query performance by **40%** through the strategic implementation of indexes and optimization techniques.

- **Led** a development team to **refactor** legacy code, improving execution speed by **25%** and reducing system bugs by **30%**.
- **Created** dynamic systems integrating React Native, PHP, and MySQL.
- **Automated** data migration scripts for seamless MySQL upgrades.
- **Incorporated** caching, lazy loading, and performance optimizations to enhance application speed and reduce resource consumption.
- **Delivered** custom software solutions that **boosted user engagement** by **25%** through user-centric design and functionality.

Software Engineer

Technology Point | Kampala, Uganda

April 2023 – December 2023

- **Engineered** scalable, high-traffic systems ensuring **99.9% uptime**.
- **Deployed** microservices and cloud-native solutions to enhance scalability.
- **Boosted** response times by **40%** via horizontal scaling and load balancing.
- **Enhanced** observability through custom monitoring and logging strategies.
- **Collaborated** across departments to align technical execution with business goals.
- **Improved** response times by **40%** through **load balancing** and **horizontal scaling** strategies.
- **Enhanced** app resilience through horizontal scaling and robust logging.

Software Developer – DataCare Systems

02/2022 – 03/2023 | Remote

- **Designed and deployed** an inventory tracking system for over 10 retail outlets, resulting in **95% stock accuracy**.
- **Integrated** third-party APIs (SMS, payment gateways), improving automation and reducing manual input by **60%**.
- **Refactored** core backend modules, reducing server costs by **30%** through optimized logic and query batching.

- **Collaborated** with cross-functional teams to deliver two major product releases on time and within budget.

Backend Developer – GritTech Solutions

06/2021 – 01/2022 | Kampala, Uganda

- **Built** RESTful APIs using PHP and Node.js for 4 enterprise web platforms.
 - **Implemented** data encryption and validation logic that **reduced security incidents by 40%**.
 - **Automated** system backups and alerts using cron jobs, ensuring 99.9% uptime.
 - **Mentored** 2 junior developers on backend development and Git best practices.
-

Education

Bachelor's Degree in Computer Science

Kampala University | Kampala, Uganda

Uganda Advanced Certificate of Education (UACE)

Seguku Hills, Uganda

Uganda Certificate of Education (UCE)

Seguku Hills, Uganda

Key Projects & Achievements

- **SQL Performance Optimization:** **Boosted** SQL performance by **80%** through query tuning, index implementation, and system optimizations within six months.
- **Web Application Development:** **Built** and deployed **15+ web applications**, including **eCommerce platforms** and **social media apps**, leveraging React, Node.js, and MySQL.
- **Code Base Modernization:** **Revamped** legacy codebases for **10 projects**, introducing best practices and modern frameworks that significantly improved maintainability and performance.

- **User Engagement: Implemented** user-centric features and scripts, resulting in a **25% increase** in user engagement and overall platform performance.
-

Certifications & Courses

- Full-Stack Web Development Certification
 - React Native Development
 - SQL Performance Optimization
-

Technical Skills

- **Programming Languages:** JavaScript, PHP, SQL, HTML, CSS, Java
 - **Frameworks & Libraries:** React, React Native, Node.js, Express.js, Vue.js, Laravel, Bootstrap, Tailwind, jQuery
 - **Databases:** MySQL, MariaDB, MongoDB, PouchDB
 - **Version Control & Tools:** Git, GitHub, GitLab, Docker, Jira
 - **Others:** REST APIs, Microservices, API Integrations, Agile Methodologies, UI/UX Design
-

Languages

- **English:** Fluent
 - **Luganda:** Native
-

Additional Information

- **Passionate about** continuous learning and staying up-to-date with the latest tech trends.
 - **Enjoys** exploring new technologies, traveling, and spending time with family, friends, and the Team.
