Professional Summary

Results-driven Senior Full-Stack Software Engineer with **6+ years of professional experience** in developing scalable, secure web and mobile applications. Extensive hands-on expertise in **PHP** and the **Laravel framework (3+ years)**, along with strong proficiency in **JavaScript, React, Vue, MySQL**, and **RESTful APIs**. Adept in MVC architecture, SQL optimization, and secure coding practices. Recognized for delivering high-performance solutions and collaborating effectively with cross-functional teams in Agile environments. Passionate about creating impactful products and innovative features that drive business growth.

Core Competencies

- **Languages & Frameworks:** PHP (5+ years), Laravel (3+ years), Node.js, JavaScript, HTML/CSS, Vue.js, React, Express.js, Electron
 - **Mobile Development:** React Native (Android & iOS)
 - **Database Systems:** MySQL, MariaDB, MongoDB, PouchDB
 - **Software Architecture:** MVC, Microservices, REST APIs, Scalable Systems, Secure Coding, Server-Side Logic
 - **Tools & Platforms:** Git, GitHub, GitLab, Docker, Jira, Agile, Postman, PHPUnit
 - **UI/UX Development:** Tailwind CSS, Bootstrap, Material Design
 - **Security Practices:** Parameterized Queries, Input Validation, Access Control, Unit Testing, Code Reviews
-

Professional Experience

Module Lead – Full Stack Engineer

Project Code Uganda – Kampala, Uganda

Jul 2023 – Present

- Led the design and development of a secure **Laravel-based Patient Management Module**, enhancing system performance by **70%**.
- Built robust server-side logic and integrated **RBAC**, aligning with HIPAA-compliance.
- Developed in-house **Vue.js packages** and replaced paid libraries, cutting costs by **60%**.
- Implemented **offline-first sync with PouchDB**, ensuring reliability in low-bandwidth areas.
- Wrote **unit tests** and optimized backend logic, reducing response time by **80%**.

Software Engineer – Full Stack Developer

Technology Point – Kampala, Uganda

Apr 2023 – Dec 2023

- Built high-availability systems with **99.9% uptime**, using **load balancing and scaling**.
- Designed and implemented **RESTful APIs** and **Laravel-based services** for multiple departments.
- Collaborated with frontend teams and DB admins to ensure **parameterized inputs** and **SQL security**.

Freelance Full Stack Developer

Remote | Kampala, Uganda

May 2020 – Oct 2023

- Completed 15+ Laravel and React projects across eCommerce, healthcare, and education sectors.
- Migrated legacy systems to Laravel 9+, improving code maintainability and reducing bugs.
- Tuned complex SQL queries and implemented **secure CRUD operations** using Laravel's Eloquent ORM.

Software Engineer – Full Stack

DataCare Systems – Remote

Feb 2022 – Mar 2023

- Developed inventory tracking apps using **Laravel + MySQL**, with 95 %+ stock accuracy.
- Integrated SMS and payment APIs, reducing manual tasks by **60%**.
- Ensured **secure database interactions** with validation and tokenization.

Backend Developer – Full Stack Engineer

GritTech Solutions – Kampala, Uganda

Jun 2021 – Jan 2022

- Created and maintained **REST APIs** using Laravel and Node.js for enterprise platforms.
- Implemented encryption and validation to **reduce system errors by 20%**.
- Wrote **unit tests** and cron jobs to automate backup and improve stability.

Software Developer

Araknerd – Kampala, Uganda

2015 – 2019

- Rebuilt backend systems for security and speed, using **PHP and SQL best practices**.
- Supported legacy and modern codebases across high-traffic platforms.

Education

Bachelor of Computer Science

Kampala University, Kampala, Uganda

UACE & UCE

Seguku Hills, Uganda

Key Projects & Achievements

- **Laravel System Refactor:** Migrated legacy projects to Laravel with modular structure, boosting performance by 80%.
 - **Scalable REST API:** Delivered robust APIs supporting thousands of concurrent users securely.
 - **Code Audits:** Regularly reviewed code for security issues, using parameterized queries and access checks.
 - **Testing Culture:** Introduced and enforced unit/integration testing standards across teams.
-

Certifications & Courses

- Full-Stack Web Development Certification
 - Advanced Laravel Techniques & Security
 - SQL Performance Optimization
 - Test-Driven Development with Laravel
-

Languages

- **English:** Fluent
 - **Luganda:** Native
-

Soft Skills

- Leadership & Mentoring
- Problem Solving & Critical Thinking
- Team Collaboration & Communication

- Time Management & Prioritization
- Initiative & Adaptability
